

CS 290: Web Development
Project Proposal
Author: Clarissa Gasciel

Theme: In honor of a job I just started and the training my coworkers and I are currently doing, I would like to make a beverage-centered site presented as the website for a wine distributor. The website will feature descriptions of various brands of wine, sake, and tea along with a description of the company and its contact information.

Organization:

- Main Page: The main page will feature the name of the company at the top alongside a menu of all the site's subpages: About, Wine, Sake, Tea, and Contact Us. Below will be the picture carousel animation with different beverage photos, followed by a form that allows the user to subscribe to the company's mailing list. The footer will contain the company's address and phone number and possibly links to social media.
 - About: This page will feature a large photo to go behind the page title. Below will be a brief description of the company and its origins.
 - Wine: This page will contain four photos that link to pages for different wines: bubbles, white, rose, and red.
 - Bubbles: This page will contain a list of links to different sparkling wines and champagnes offered by the company. The links will lead to a page that gives a photograph and description of the wine. On each of these pages, there will be a link to an outside website that describes the wine or its producer.
 - White: This page will contain a list of links to different red wines offered by the company. The links will lead to a page that gives a photograph and description of the wine. On each of these pages, there will be a link to an outside website that describes the wine or its producer.
 - Rose: This page will contain a list of links to different red wines offered by the company. The links will lead to a page that gives a photograph and description of the wine. On each of these pages, there will be a link to an outside website that describes the wine or its producer.
 - Red: This page will contain a list of links to different red wines offered by the company. The links will lead to a page that gives a photograph and description of the wine. On each of these pages, there will be a link to an outside website that describes the wine or its producer.

- Sake: If there is time, this page will be formatted like the wine page, except that it will contain a list linking to descriptions of various sakes, skipping the categorizing element. The alternative is have the page contain a single list of available sakes with brief descriptions and photos.
- Tea: This page will contain a list of available teas with brief descriptions of each.
- Contact Us: On this page will be the company's contact information (address, phone number, and email) and a button that allows the user to download a list of prices.
